

MENTOR THE NEXT GENERATION OF BIOENGINEERS

Commitment: 10 hours, mid-November-March; Virtual via Zoom

We're a nonprofit on a mission to BioBuild across America. Our vision for the future is one in which every student's high school life science experience is engaging and prepares them for fulfilling careers that they want and that society needs.

With help from scientists who generously volunteer their time and talent, we can train and inspire the innovative scientists, engineers, and STEM workforce of tomorrow.

BioBuilderClub

This program empowers teams of high school inventors from a dozen US states and four countries to combine engineering and life science to design, build, and test their own ideas to solve real-world problems.

Who We're Looking For:

- Scientists who are excited to support high school students exploring synthetic biology through team-based research projects
- Individuals at all stages of their career who are willing to share their journey and inspire the next generation

Why Mentor?

- Build your mentorship skills
- Connect with the global biotech education community
- Make a lasting impact on future innovators

Interested?

Become a BioBuilderClub mentor or volunteer to share your education and career journey at a webinar with tomorrow's scientists.
