

## GET STARTED WITH OUR *BIOTECHBUILDER* EDUCATOR TRAINING

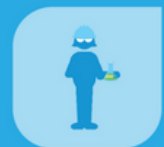

Educators will learn how to transform a passion for science into practical know-how with our proven, comprehensive, hands-on curriculum that prepares students for purposeful and wealth-building careers in life science.

Start your deep dive into BioTechBuilder's classroom and laboratory activities with our online platform that includes

- ready-to-use teaching slides
- classroom and lab demonstration videos
- lab materials and instructions to try the experiments
- student assignments and
- pointers for preparing for professional certifications and micro-credential testing.

### AVAILABLE NOW

Part: Lab Skills

Part 2: DNA Foundations

Part 3: Protein Foundations

Part 4: BioManufacturing

Part 5: Synthetic Biology

### COMING SOON

### REGISTER TODAY!

Register for Part One:  
Lab Skills

Register for Part Two:  
DNA Foundations

The cost for each of the five parts in the training series is \$400/teacher. Complete parts in order to receive a Master Teacher Certificate and lab coat. For more information, visit [biotechbuilder.org/training](https://biotechbuilder.org/training).

## SHAPE THE FUTURE OF BIOTECHNOLOGY

Our "biotechnology-in-a-box" curriculum introduces essential lab concepts and techniques for making solutions, growing cells, analyzing DNA, biomanufacturing of proteins, and the design of novel biotechnologies.
