

# GET STARTED WITH OUR LAB SKILLS TRAINING

Educators will learn how to transform a passion for science into practical know-how with our proven comprehensive, hands-on curriculum that prepares your students for purposeful and wealth-building careers in life science.

Start your deep dive into BioTechBuilder's classroom and laboratory activities related to making solutions and culturing cells.

Our online training platform gives you access to

- ready-to-use teaching slides
- classroom and lab demonstration videos
- lab materials and instructions to try the experiments yourself
- student assignments and
- pointers for BCSI micro-credential testing.
